Methods and Directions

Golden Milk Cheese Cake

- Line an 8-inch round cake pan with parchment paper.
- Prepare the crust. Add the dates, almonds, coconut, maple syrup, and salt to a high-speed blender or food processor and pulse until it begins to clump. Pour the filling into the prepared baking pan and use your fingertips to press down the crust into an even layer. Use a small glass to roll it smooth, if desired. Chill crust while you prepares the filling.
- Drain and rinse the soaked coconut flakes and cashews and add them to the blender with maple syrup, ground chia seeds, ginger, turmeric, vanilla, lemon zest, cinnamon, salt, and pepper.
- With the blender on low, slowly add the cool water, increasing the speed as you pour. Blend on high for 2 minutes, scraping down the sides as needed, until the filling is velvety smooth.
- Pour in the coconut oil and blend on low just to combine. Pour the filling over the chilled crust, smoothing out the top as needed.
- Refrigerate for at least 4 hours, until firm.
- Optional: dust top with a 50/50 mix of ginger and turmeric.
- Once the cheesecake has chilled, slice it into 10-12 slices and serve topped with whipped coconut cream and puffed quinoa crumble, if desired.
